

How To Use PicMonkey To Resize/Crop Images

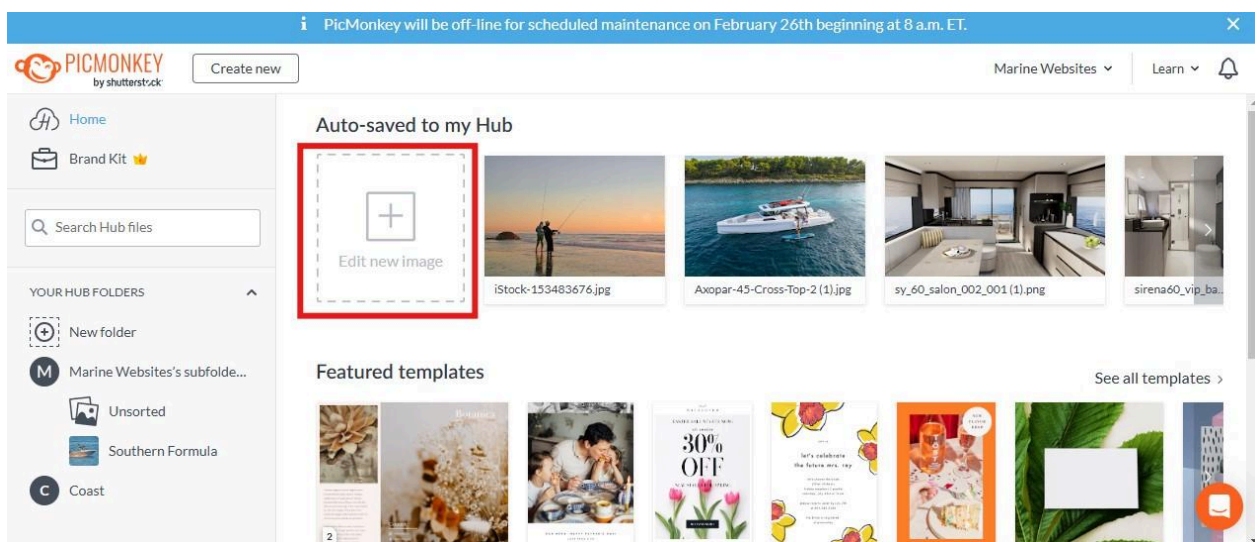

Sign Up for Free

1. Create a free [PicMonkey account](#) to get started. Enjoy access to the photo editor and graphic design tools for a 7-day trial. After the trial, you can choose to continue with a monthly plan or save money by switching to an annual subscription.

Open an Image

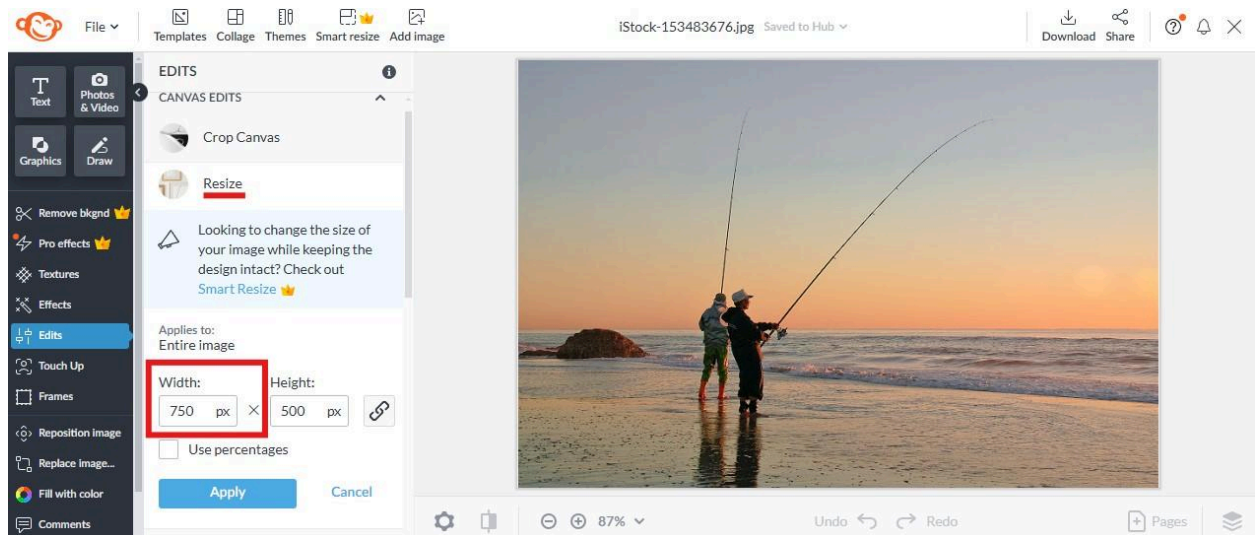

2. Upload your photo or video to PicMonkey by either dragging and dropping your file directly from your desktop or by selecting your images from the editor. It's quick and simple!

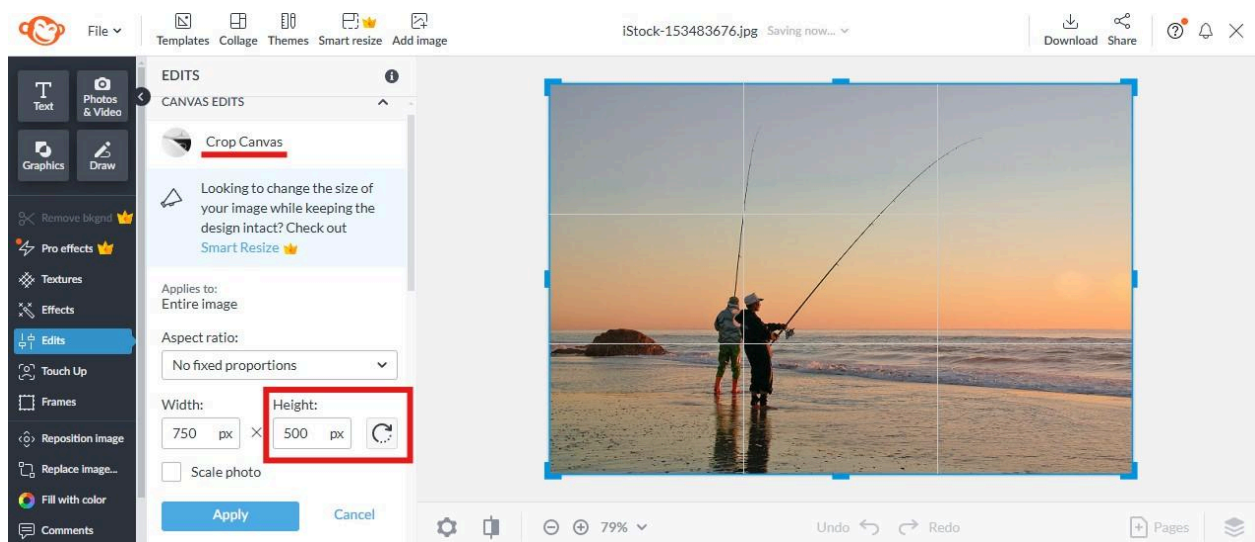

Crop Photos

3. Use the crop tool to adjust the frame around your image. You can choose from preset crop sizes or enter your own pixel dimensions for a custom crop, ensuring the perfect fit for your needs.

Resize image first

Then crop the image

4. Apply and Share

Once you're happy with the crop, click "Apply" to finalise the changes. Then click "Download",
